Airline **Cost Management**

Optimizing Operations Through Real-Time
Operating Costs Management

The airline industry is a complex place with multiple layers and hundreds of stakeholders including ancillary vendors, airport authorities, technology partners, GDS and many more. Effective communication and timely sharing of information between these stakeholders impacts airline margins, efficiencies and profitability.

Some areas where airlines constantly feel challenged to deliver are:

- **Increasing customer expectations**
- **Reduction in operating cost**
- **Fuel Prices**

Airline Cost Management Framework

A comprehensive route profitability solution

Get Faster and Accurate Profitability Reporting

- Estimate & predict the profitability of the airline operations down to tail number
- Any aspect of an operated flight can be reviewed for analysis, planning & decision-making

Capture Hidden Costs

- All charges get analysed including different noise charges, lighting charges, terminal navigation charges and VSAT charges

Enable Efficient Budget Planning

- Forecast the simulation of individual flight events
- Create the most efficient and profitable route plan

Get Faster ROI

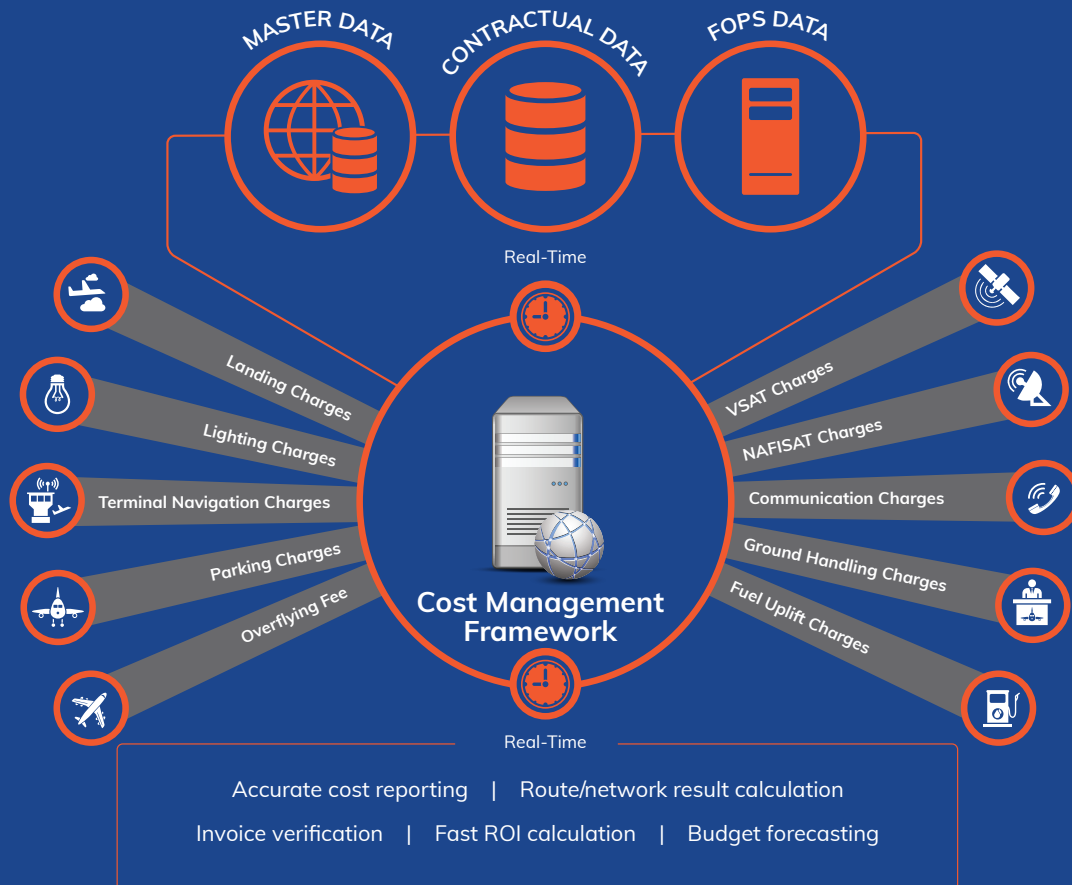

- Completely eradicate overbilling from suppliers
- Create seamless creation of accurate accruals
- Both cloud and on-premise deployment option available

Features

Airline Cost Management Framework is an integrated solution that automates end-to-end business processes to ensure smooth operations. It provides real-time data of the direct costs involved in flight operations and helps determine route profitability.

IGT's framework combines data from Flight Operations System (FOS), revenue accounting, departure control system and BI/DW system to provide real-time, unified view of the route profitability.

It also includes cost like Crew, Hotel, Transport, web voucher etc. to provide 360 degree view of the real-time direct operating costs.

Integrated Modules

- Fuel
- Airport & Ground Handling Charges
- Navigation Charges
- Integrated Contract Management
- Automated Invoice Control & Accruals Generation
- Revenue Management System
- Simulation Reports, Realistic Forecasts & Dynamic Budgets
- Catering Charges

Make Cost Operations Management Simple

15% reduction in operating costs due to real-time monitoring.

99% accuracy of estimated costs.

40+ **pre-built** customizable dashboards and what-If analysis reports.

450+ reusable business scenarios.

30+ direct and indirect cost components.

5% increase in operational efficiency.

Drill down reporting from different aggregated levels to detailed figures.
